Dear Parents,

We have unsung heroes at home. So far we have been talking about Health care workers, Delivery boys etc but have forgotten to acknowledge Our bundle of Joy's Yes, Our Kids. How they are standing with....Let's acknowledge that our kids have been the most patient beyond their age and intellect, in these testing times. It is not easy for little ones to tame their mind to stay indoors all day all night, for days. It is hard on them to suddenly lose contact with their friends and teachers from school. They crave for open spaces to run around. We have locked them down at our homes with some toys. Their world changed overnight and most of them could hardly ever express their anguish. We owe them an apology for creating such a harsh world they didn't deserve. They deserve a loud applause for being there with us today, stronger than us in these unprecedented circumstances. Give them a tighter hug, enjoy those naughty tricks , laugh at their jokes , let them make the house dirty, read them that extra story, comfort their insecurities & add some sparkle to their life wherever we can. They have been forced to act more mature than their age by the circumstances. Hopefully, this have too shall pass. Till then let's celebrate our heroes at home too ,our kid.

Arty Awasthi

(Principal- G.D. Goenka School Varanasi)

We
have
unsung
heroes
at home.

Yes,
Our Kids

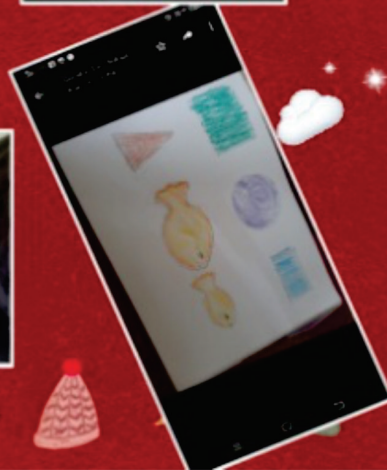

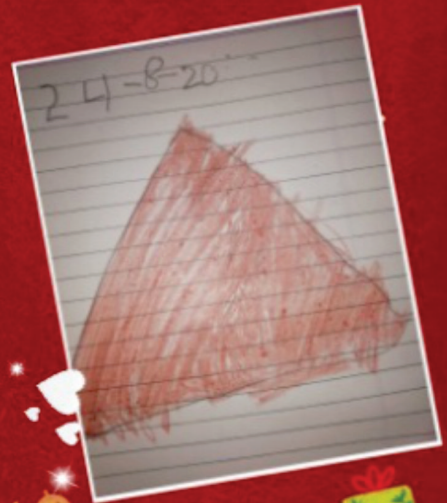

We all got time to do

1. The students got the most valuable time of their family members and will get the full attention of their parents.
(If a student has grandparents, he/she is the luckiest).
2. Parents/grandparents can become amazing teachers by telling them the history of their parents, ancestors, family and positive sides of their roots. They can tell them the family stories.
3. They came closer to their parents and enjoy the private moments which they never get/hardly get. Students also realised the importance of parents in their life, which is ahead of giving their tuition fee, making them delicious lunch-box or permitting them to party out.
4. They also experience the world beyond the mobile phone, computers and tabs, play games with their families.
5. A student also learns through eLearning courses widely available in the market, which are market updated and well recognised worldwide. Parents can learn with them together. All become one class.
6. Papa and Mumma became teachers to their children, making them learn to cook the food in "such a critical time".
7. Students learn to clean the house, garden area, furniture, walls and the curtains too. They enjoy new learning of doing house-hold work.
8. Gardening is a fantastic experience.
9. Exercising with Papa and Surya namaskar with Mom, a super enriching experience during this time. This also helps their parents improve their immunity and reduce the chances of gaining excess weight during this time of staying at homes. By the time we come out of the lockdown, a student will be completely new and might have experienced a new life.

Arty Awasthi

(Principal- G.D. Goenka School Varanasi)

ECOLOGY & CULTURE

“Our work is not to teach, but to help the absorbent mind in its work of development. How marvelous it would be if by our help, if by an intelligent treatment of the child, if by understanding the needs of his physical life and by feeding his intellect, we could prolong the period of functioning of the absorbent mind!” –Maria Montessori,

As you enter our Nursery classroom, you will likely experience the hum of a typical Montessori environment: students working Independently and with their peers, teachers giving lessons to individuals and small groups. Giving students the Ecology & Cultural lessons and skills needed to make discoveries about our world is responsive to their developmental curiosity and aided by their absorbent minds. By introducing lessons about the intricacies of our world early in their education, our students are exposed to concepts like political geography, Earth science, and engineering, and are able to speak to these concepts at a young age.

Technology in the Era of COVID-19 Pandemic

Technology will not be able to avoid the onset of a pandemic; nevertheless, it can assist in managing a crisis more effectively. We all know how badly COVID-19 has impacted our lives, both personal and professional. During this time of sheer uncertainty and constant fear, our willingness to adopt technology has been our lifeline. Technology impacted our lives in the current COVID-19 pandemic.

- 1.Distance Learning-** Educational institutions started their courses online to make sure education is not disrupted due to the pandemic. Technologies used in distant learning include augmented reality, 3D printing, virtual reality, and robot teachers enabled with artificial intelligence.
- 2. Online Entertainment-** Online streaming of live shows and concerts have gained traction across the world. Several film production companies have also been releasing their movies via Over The Top (OTT) platforms such as Amazon Prime Video, Hotstar, Netflix, Zee5, Voot Select, etc. Many gaming platforms
- 3.Contact Tracing Applications-** Contact tracing apps like Aarogya Setu have assisted in tracking the COVID-19 spread. Technology has also helped in educating people about the entire situation and reminding them to take the necessary precautions. Telecom operators such as BSNL, Jio, Airtel, etc. have used caller tunes for spreading awareness about the pandemic. The facial recognition technology has helped in identifying people accurately even when they are wearing a mask. Technology has also helped in monitoring the movement of quarantined people. CCTV cameras which are enabled with facial recognition feature have helped in identifying infected individuals who do not follow the rules and step out of their homes despite being quarantined.
- 4.Contactless Online Deliveries -** The online grocery market witnessed tremendous growth during the pandemic due to the soaring demand amongst consumers. Families, particularly with children and older people, preferred to place their grocery orders online.
- 5.Robotics-** Robots are now being used to clean infected areas and for delivering food to quarantined individuals. In a few countries, remote-controlled robots are being used for helping medical professionals to conduct critical tasks such as mouth swab collection for conducting the virus detection test, for conducting ultrasound scans, etc. Drones are being used for food deliveries, tracking population, transporting test kits, spraying disinfectant, and for delivering medicines to quarantine areas, etc.
- 6.Fitness & Health Apps -**New alternatives are being introduced by health and fitness apps to help people remain fit at the comfort of staying indoors due to the pandemic situation. Several fitness and health brands have started conducting live workout sessions on their apps and social media platforms. These initiatives have also seen decent traction.
- 7. Technology-Based Temperature Monitoring -** Infrared and wireless thermometers have now become the most commonly used medical equipment at toll gates, entry and exit gates of offices, airports, shopping malls, hotels, railway stations, shops, hospitals, and other public places. These temperature monitoring technologies have assisted in measuring the body temperature of individuals from a distance; these temperature measuring devices have also been useful in identifying the individuals who might need further investigation.
- 8. Work From Home (WFH) -** The work from home option has ensured business continuity for various companies and businesses. Internet, data privacy security, virtual meetings, cloud conferencing, etc. have assisted professionals in adapting themselves to work from the home scenario with ease. WFH has also ensured that the deliverables are not delayed. Remote working has been a blessing in disguise, which has helped us to a great extent to maintain and follow social distancing protocols.

हिंदी है हमारा अभिमान

हिंदी है हमारा श्रृंगार,

हिंदी ही है हमारे संस्कार ।

भारत में प्रत्येक वर्ष हिंदी दिवस 14 सितंबर को मनाया जाता है ।

हिंदी हमारी मतृभाषा के साथ-साथ राष्ट्रभाषा भी है । 14 सितंबर

1949 को हिंदी को भारत की आधिकारिक भाषा के रूप में

स्वीकारा गया था । हिंदी देवनागरी लिपि में लिखी जाने वाली भाषा

है । इससे मिलते जुलते कई और भाषा है जैसे बांग्ला, संस्कृत व

अन्य, आमतौर पर इस दिन, स्कूल, कार्यालयों और कॉलेजों समेत

विभिन्न संस्थानों में इसे बड़े उत्साह के साथ मनाया जाता है ।

स्कूलों में हिंदी भाषा की प्रतियोगिताएं होती है । कई लोग हिंदी

भाषा और भारतीय संस्कृति के महत्व के बारे में बात करने के लिए

आगे आते हैं। प्रत्येक वर्ष, ये दिन हमें हमारी वास्तविक पहचान की

याद दिलाता है और हमें अपने देश के लोगों के साथ एकजुट

करता है । हमें संस्कृति और मूल्यों को बरकरार रखना चाहिए और ये दिन इसके लिए एक अनुस्मारक के रूप में कार्य

करता है । हिंदी दिवस एक ऐसा दिन है जो हमें देशभक्ति भावना के साथ प्रेरित करता है ।

रामायण हमारे देश का सबसे प्राचीन महाकाव्य है यह बुराई पर अच्छाई की जीत की कहानी है। इस महाकाव्य में हिंदू संस्कृति से संबंधित बहुत से उपदेश निहित है और यह हमें कर्तव्य, प्रेम, निष्ठा, साहस और पराक्रम का सही अर्थ बताते हैं। अतः बच्चों आप निम्नलिखित शीर्षकों में से कोई एक शीर्षक का चयन कर उस प्रेरक कहानी को सहायक सामग्री के साथ प्रस्तुत करें -

१. हनुमान जी को बजरंग बली क्यों कहा जाता है ?
२. भगवान राम की बहन शांता
३. हृदय में सीताराम
४. गिलहरी की कहानी
५. रावण के 10 सिर
६. सीता और मंदोदरी की कहानी
७. हनुमान जन्म
८. श्री राम के भाइयों का अवतार
९. कुंभकरण की नींद का रहस्य
१०. लक्ष्मण की नींद

*गतिविधि का दिन एवं समय - शनिवार १९-०९-२०२०, ३ :
०० बजे
निर्धारित समय २-३ मिनट प्रत्येक अभ्यर्थी।
